

DC HydroGlide

The perfect skin glide with multi-hydration function

DC HydroGlide, a gel concentrated with moisture binding molecules offers the perfect skin cushion-hydration experience. Simple to formulate with, this gel emulsifies, opacifies and stabilizes formulations. Upon application, the result is a lasting *cascade hydration* with superb skin feel. DC HydroGlide is an excellent alternative to petroleum based ingredients.

Water Binding Glide

Algae Polysaccharides provide surface cushion layers protecting against water loss.

Soy Phospholipids restore lipid barrier function with water-lipid bilayers.

Betaine derived from beets, binds water via dipole-ionic attraction forces providing an excellent humectant effect.

Sodium Hyaluronate mimics skin's own water binding ability, yielding a lasting hydrating effect.

PRODUCT ATTRIBUTES:

- Superior hydration performance with a barrier-humectants hybrid gel.
- Disperses easily in carbomer and other gels, emulsions or any composition with an external water phase.
- Functional conditioning and moisturization for both skin and hair products.
- Excellent gliding skin feel, with built-in emollient properties.
- Naturally inspired composition is ultra-gentle for skin care.
- Recommended use level: 3-10%.

INCI Name:

Glycerin (and) Water (and) Glycine Soja (Soybean) Germ Extract (and) Beta Vulgaris (Beet) Root Extract (and) Algae Extract (and) Sodium Hyaluronate
